

Porcine

Test	Samples	Min Volumes**	Test set up	Maximum expected turnaround	Notes
Porcine Reproductive + Respiratory Syndrome Virus ELISA (PRRS)	Serum Plasma <i>Whole Blood*</i>	50µl	As required	7 working days	Samples required the day before for prep.
<i>Mycoplasma hyopneumoniae</i> ELISA (<i>M. hyo</i>)	Serum Plasma <i>Whole Blood*</i>	20µl	As required	7 working days	
Swine Influenza HAI (Swi Flu)	Serum Plasma <i>Whole Blood*</i>	200µl	As required	10 working days	This test relies on reagents from third party suppliers. Please contact us when sending samples so we can preorder the reagent to ensure specified turnaround.
Porcine Circovirus PCR (PCV-2 PCR)	Serum <i>Whole Blood*</i>	200µl	Call for advice	Call for advice	Call for advice - Speak to PCR Supervisor

*Whole blood can be sent for antibody tests but at least double the volume mentioned for serum/plasma must be sent.

**The volumes indicated are for each individual test, for samples that require multiple tests you must add the volumes for each test

µl = microlitre. 1000µl = 1ml (1 millilitre)
