*A DNA profile has been calculated for Kira (sample 1004). The DNA profile of Kira is an exact match for the offspring of the Mother (1001) and Father A (1002). The result indicates that Kira is the offspring of the Mother and Father A. The result confirms that Kira is not the offspring of Father B (1003). It is theoretically possible that the DNA profile of Kira would also match to different parental samples, however this is highly unlikely in unrelated birds.*
